

THAW TRAN

FULL-STACK WEB DEVELOPER

Ruby | Python | React | Meteor

PROFILE

I've 6+ years Ruby experience, 1+ year React experience, 1 year Python experience and 3+ years Meteor experience.

I hate doing things repeatedly, that's why I love programming. From using my computer to how I deploy applications or managing servers, I always love writing my own scripts.

I've dealt with real online services, specially SaaS applications. With experience of building apps from scratch, I can make my own deploying, testing and benchmarking scripts. I faced high traffic services, so making stable applications as well as configuring load balanced servers could not embarrass me.

I hope I could have a chance working with and learning from your team.

Remotely working as a full-stack developer is truly my dream.

EDUCATION

Hanoi University of Technology

Software Engineer

2011 - 2014

EXPERIENCE

SMARTRPA

Remote full-stack web developer

01/2020 - 05/2020

This web service application comes with an idea of Robotic Process Automation for digital marketers. But it had to stop due to the Corona virus pandemic. But luckily, this project helped me learning a lot about Python and ReactJS, which both are technologies that I'm focusing to learn now.

Techs: Python (Django REST Framework), ReactJS, PostgreSQL

SHAREST

Remote part-time full-stack web developer

09/2019 - 04/2020

<https://www.sharest.co/> is a link shortening tool helps digital marketers creating CTA, collecting advertise/audience information.

I was working for this project 2-4 hours a day.

Techs: Meteor, React, MongoDB

GLOLENT

Remote part-time backend Ruby developer

06/2019 - 02/2020

I support Glolent (<https://www.glolent.com>) which is a portal for remote freelance developer, as a back-end Ruby on Rails developer and I work part-time for 5-10 hours a week.

I was busy and could not support them anymore, even I love the community.

Techs: Ruby on Rails, GraphQL, PostgreSQL

BOOST

Remote full-time full-stack web developer

01/2018 - present

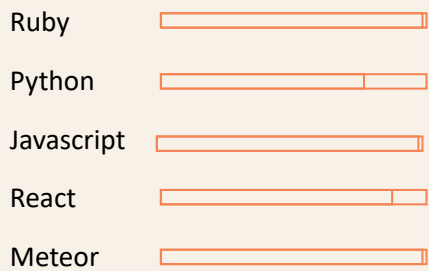

<https://boost.link> is a digital marketing tool service to collect leads through social media accounts like Facebook, Twitter, LinkedIn, etc...

I built this SaaS from scratch and also managed all the load balanced servers. I created my own scripts for deploying and managing servers.

I'm still continue supporting this project.

Techs: Meteor, Javascript, JQuery, MongoDB

SKILLS

Frameworks:

Ruby on Rails, Django, Django REST, Meteor, React, Bootstrap

Technologies:

Docker, Kubernetes, Heroku, AWS, Google Cloud, REST API,...

Database Technologies:

MySQL, PostgreSQL, MongoDB

Operating Systems:

Unix-based, MacOS, Linux like Ubuntu, Mint,...

MINERVA

Remote full-stack Ruby on Rails developer 01/2018 - 05/2019

This project belongs to a Japanese company which is an advertising management application includes some new marketing technologies like: Tag management solutions, Data management solutions, CookieSync, Cross-device marketing solutions,....

Techs: Ruby on Rails, Google cloud, BigQuery, Kubernetes, MySQL

COORDISNAP

Back-end Ruby on Rails developer 04/2016 - 01/2018

This project belongs to the company who owns Z.com. It's a social networking for fashion lovers which has 3.5+ million mobile downloads and 1+ million active users monthly.

Techs: Ruby on Rails, Master and Slave MySQL, Memcache, Elastic search, AWS
