

THAW TRAN

FULL-STACK WEB DEVELOPER

Ruby | Python | React | Meteor

PROFILE

I am Thaw, a full stack developer with 6+ years Ruby, 1+ year React, 1+ year Python and 3+ years Meteor experience.

I hate doing things repeatedly, that's why I love programming. And I do believe coding is mainly about the mindset and logic.

I've dealt with real online services, specially SaaS applications. With experience of designing and building apps from scratch, I can make my own deploying, testing and benchmarking scripts. So making stable applications as well as configuring load balanced servers could not embarrass me.

I do believe that dealing with real traffic and real online service is much more complicated than building a MVP.

I hope I could have a chance working with and learning from your team.

Remotely working as a full-stack developer is truly my dream.

EDUCATION

Hanoi University of Technology

Software Engineer

2011 - 2014

EXPERIENCE

SMARTRPA

Remote full-stack web developer

01/2020 - 06/2020

This web service application comes with an idea of Robotic Process Automation for digital marketers. But it had to stop due to the Corona virus pandemic. But luckily, this project helped me learning a lot about Python and ReactJS, which both are technologies that I'm focusing to learn now.

Techs: Python (Django REST Framework), ReactJS, PostgreSQL

BOOST

Co-Founder & CTO.

01/2018 - present

<https://boost.link> is a digital marketing tool service to collect leads through social media accounts like Facebook, Twitter, LinkedIn, etc...

I built this SaaS from scratch and also managed all the load balanced servers. I created my own scripts for deploying and managing servers.

I made some mistakes from the beginning of this project, but I also learnt from it.

Techs: Meteor, Javascript, JQuery, MongoDB

GLOLENT

Remote part-time backend Ruby developer

06/2019 - 02/2020

I support Gloleant (<https://www.gloleant.com>) which is a portal for remote freelance developer, as a back-end Ruby on Rails developer and I work part-time for 5-10 hours a week.

I was busy and could not support them anymore, even I love the community.

Techs: Ruby on Rails, GraphQL, PostgreSQL, Selenium

SHAREST

Remote part-time full-stack web developer

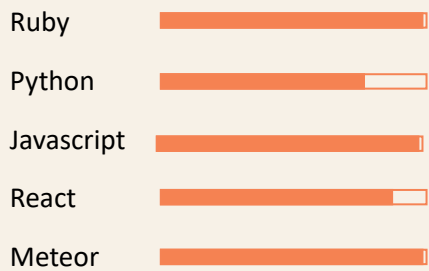

09/2019 - 04/2020

<https://www.sharest.co/> is a link shortening tool helps digital marketers creating CTA, collecting advertise/audience information.

This project originally is TagOn which I was also Co-founder and CTO. We sold it and then it's brand was changed to Sharest. After that, I was supporting for the project 2-4 hours a day.

Techs: Meteor, React, MongoDB

SKILLS

Frameworks:

Ruby on Rails, Django, Django
REST, Meteor, React, Bootstrap

Technologies:

Docker, Kubernetes, Heroku,
AWS, Google Cloud, REST API,...

Database Technologies:

MySQL, PostgreSQL, MongoDB

Operating Systems:

Unix-based, MacOS, Linux like
Ubuntu, Mint,...

MINERVA

Remote full-stack Ruby on Rails developer 01/2018 - 05/2019

This project belongs to a Japanese company which is an advertising management application includes some new marketing technologies like: Tag management solutions, Data management solutions, CookieSync, Cross-device marketing solutions,....

Techs: Ruby on Rails, Google cloud, BigQuery, Kubernetes, MySQL

COORDISNAP

Back-end Ruby on Rails developer 04/2016 - 01/2018

This project belongs to the company who owns Z.com. It's a social networking for fashion lovers which has 3.5+ million mobile downloads and 1+ million active users monthly. It's an interesting TDD project.

Techs: Ruby on Rails, RSpec, Master and Slave MySQL, Memcache, Elastic search, AWS
